

ResQMe

Powerful hand-held tool: A fierce but absolutely safe center-punch helps break tempered side windows and a carefully concealed razor blade allows to slice through a jammed seat belt to rescue victims trapped inside any vehicles.

A Gift For Life!

Ready for duty

ResQMe™ has quickly proven to be must-have rescue tool for paramedics and firefighters around the world. This essential safety product is specifically designed to assist crews while on and off duty and to make their job safer. ResQMe™ is also awarded for its uniqueness!

Tested for safety

Made in USA, ResQMe™ is regularly tested at the manufacturing plants in Indiana (U.S.). Fire and safety instructors are constantly testing ResQMe™ at their extrication classes and on duty. TUV is annually testing the product according to safety requirements (GS Mark)

What crews say: www.resqme.com [2 in 1 Keychain Rescue Tool]

"We have been using ResQMe for many years with great success, and I would recommend it to anybody who wants to be properly prepared for an emergency." Firefighter Alan E. Reitz

"The little vehicle survival tool ResQMe... was put to good use this past weekend... on the Ohio Turnpike... A small child in the child seat had managed to wrap the seat belt around his neck and it was tightening with each movement. Fortunately, I had the little tool and cut the belt to relieve the pressure on the child." All went well and the small child managed a smile along with his tears. Thank you.
