Mr. Laurent Colasse

I have been teaching SWAT and Officer Survival Schools for many years.

In my training I have utilized several different devices for breaking safety glass. Since my introduction to the ResQMe, I have used and recommended it for these task. It not only breaks the windows better than any other device I have utilized but also cuts through seat belts with ease.

In south Florida with so much water around us and the loss of life every year due to vehicles driving into canals or lakes, I recommend the ResQMe to be carried in personal vehicles. I have placed one in mine and my wife's vehicles and I would highly recommend this device to everyone.

Thank you,

Ward Stanley
